

AI VIDEO PROMPT PACK · READY TO PASTE

FORGED IN FIRE

RUNWAY ML · KLING AI · PIKA LABS · CAPCUT

RUNWAY GEN-3

KLING 1.6

PIKA 2.0

ALL PLATFORMS

⚡ HOW TO USE THIS PROMPT PACK

STEP 1 - GENERATE

Copy each prompt → paste into
Runway, Kling, or Pika → generate
3-4 variations per shot

STEP 3 - EDIT

Import into CapCut or DaVinci →
apply high-contrast grade → layer
audio from the SFX list

STEP 2 - SELECT

Pick the best take from each
batch. Aim for 3-5 generated clips
per part

SETTINGS

9:16 vertical · 4K if available ·
24fps for cinematic feel · motion
intensity: HIGH

FINAL ASSEMBLY — STEP BY STEP

- 1** **Generate 3-4 variations** of each prompt above. Use the platform tags to know which tool handles each shot best. Kling excels at wide cinematic shots; Runway handles close-up detail and lens effects.
- 2** **Import into CapCut** (free, TikTok-native). Arrange clips in order. Trim to 1-3 seconds each. The total per part should hit 30-45 sec.
- 3** **Color grade:** Apply a high-contrast desaturated LUT. In CapCut: Filters → Cinematic. Push shadows to near-black. Pull highlights. Reduce saturation to 30%.
- 4** **Audio:** Layer a deep bass cinematic track from **Epidemic Sound** (search "military cinematic tension"). Add SFX: gunfire, boots, heartbeat, radio. Mute music on the final shot — silence is the loudest sound.
- 5** **Text overlays:** Use Bebas Neue font, white, no shadow. Slam on — no fade-in. Every part ends on hard cut to black. Add "PART 2", "PART 3" etc. as white text on black for 0.5 sec.
- 6** **Export:** 9:16 vertical · 4K 60fps · H.264 for TikTok upload. Post each part 24-48 hours apart to build anticipation.

Runway Gen-3 Alpha

runwayml.com · Best for close-ups, POV, lens effects, and slow motion detail shots

Pika 2.0

pika.art · Best for quick iterations and impact moments — fast and punchy

Kling AI 1.6

klingai.com · Best for wide cinematic shots, formation sequences, and atmospheric haze

CapCut + DaVinci

Free editing. CapCut for speed, DaVinci for color grade precision and final export
